03

A solution provider for fastener requirements

The source presentation describes Riegel as a subsidiary of Precise Fasteners and a supply-chain company for C-Class parts.

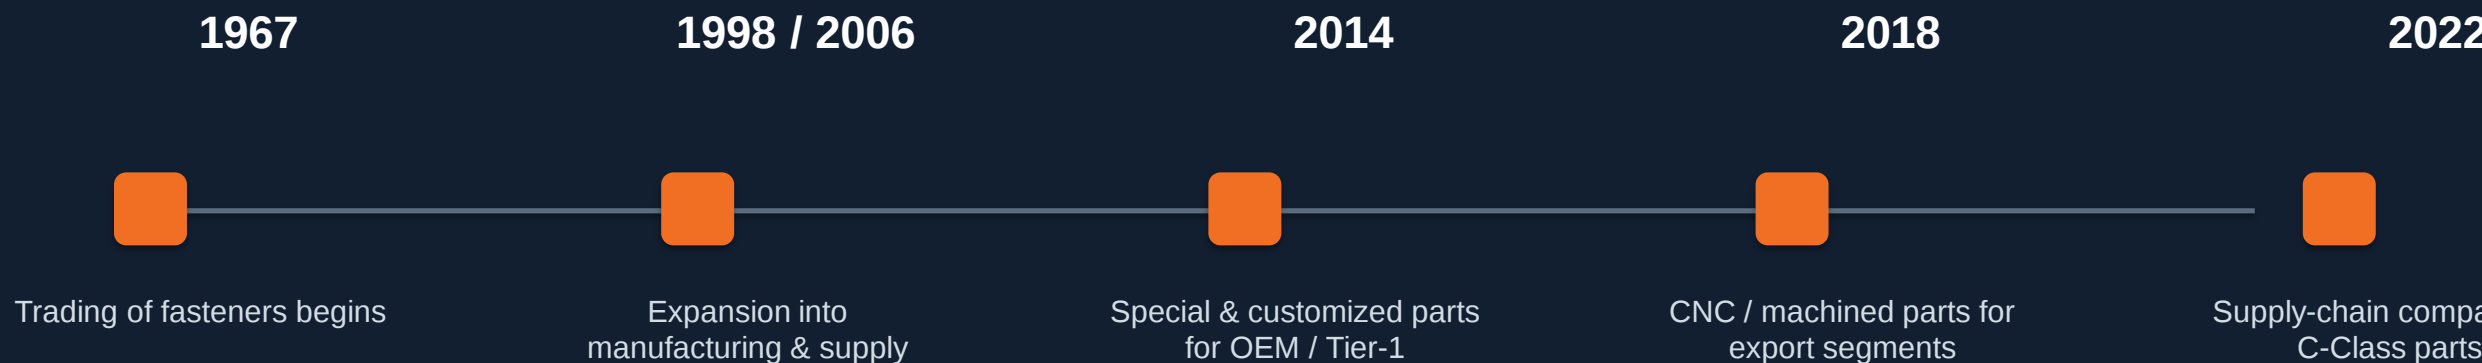

Company profile

- Riegel Fasteners India Pvt. Ltd. was created as a solution provider for industrial fastener requirements.
- Single-point source concept: consolidate fastener requirements through one supply partner.
- Ferrous & non-ferrous fastener manufacturing and supply-chain capabilities.
- More than 10,000 fastener types across automotive, industrial and engineering segments.

Group capability & network

Milestones that shaped the business

05 The source deck presents a progression from fastener trading to manufacturing, customized parts and integrated C-Class supply-chain services.

A multi-location operating footprint

Head office / warehouse in Delhi NCR with additional group units and Mumbai presence.

**Unit 1 Riegel Fasteners India Pvt. Ltd.**

Ballabgarh, Faridabad – 121004

Unit 2 Precise Fasteners Pvt. Ltd.

Ghatkopar, Mumbai – 400086

Unit 3 Fastener Technology Pvt. Ltd.

Andheri East, Mumbai – 400059

Unit 4 Srishaa Machined Fasteners Pvt. Ltd.

Vasai East, Palghar – 401210

Supporting demanding industrial segments

The source deck lists automotive, agriculture, construction, transportation, wind, electronics, gearboxes, paper & pulp, medical and heavy engineering.

Automotive OEMs

Agriculture / Construction

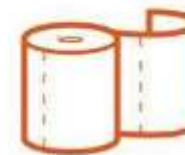

Transportation / EV

Solar & Wind

Electronics

Medical Equipment

07 | CUSTOMER VALUE

More than a fastener supplier

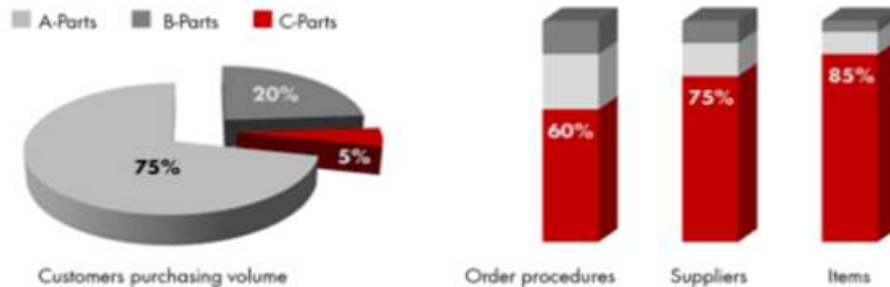

Engineering + quality + purchasing + logistics
combine into one customer-facing service model.

08

Look beyond piece price

The source presentation highlights processing costs—procurement, logistics and assembly—as a major part of total cost.

C-PARTS. SMALL PARTS - BIG EFFECT!

Total Cost Approach

What we optimize

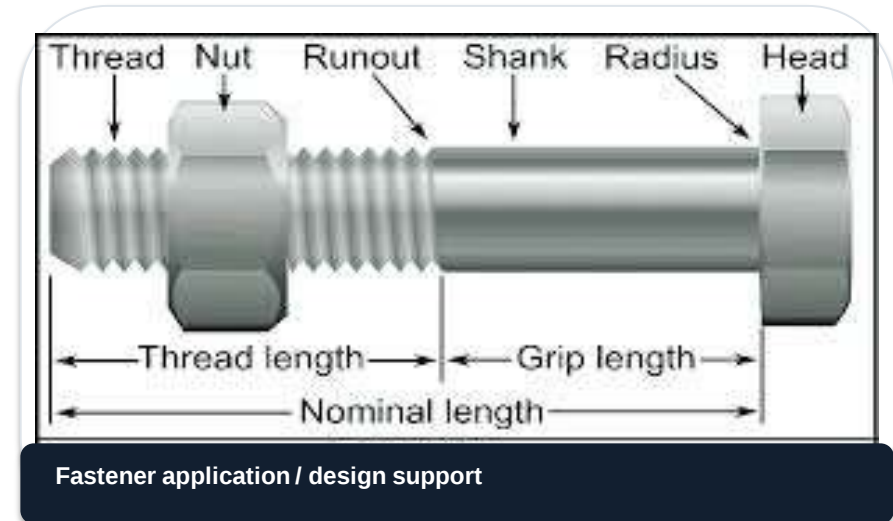

- Supplier consolidation
- Logistics and transport flows
- Inventory and working capital
- Quality cost and PPM
- Delivery performance
- Packaging and process control

Engineering support from design to production

The source deck lists support during design, prototyping, launch and production, plus standardisation and cost reduction.

Engineering services

- Design, prototyping, launch & production support
- Fastener testing and verification
- On-going product development
- Tier-2+ supplier management
- Bill of Material maintenance
- Cross-productline / brand standardisation
- New technology implementation
- In-place cost reduction

Quality built into the supply process

Inspection, change management, sampling, documentation and supplier development are central to the quality model.

Quality activities

- Incoming inspection
- Change management
- Sampling / line trials
- Functional builds
- Material certificates
- Supplier quality development
- Reduction of quality incidents
- On-site support

Control the product. Control the process.

Inspection & measurement

Strategic sourcing, not just buying

The source deck emphasizes supplier selection, RFQ management, re-sourcing, competitive pricing and emerging-market sourcing.

Sourcing approach

- Supplier selection & reduction
- RFQ stage management
- Re-sourcing and benchmarking
- Competitive pricing
- Long-term agreements
- Strategic alliances
- Emerging-market sourcing
- Global approach to supply market

Delivery performance with inventory control

The logistics model in the source deck combines ERP, forecasting, inventory management, transport-flow optimization and customer-specific delivery.

Customer outcomes

- Inventory reduction
- On-time delivery
- Integrated ERP & inventory management
- Forecasting on a monthly basis
- Optimized inbound / outbound flows
- Own packaging
- Cost control
- Continuous improvement

Warehouse

Inventory

Information when the supply chain needs it

The source deck describes ERP, inventory visibility and automated email alerts.

Supplier notifications

- Minimum / maximum stock alerts
- ASN receipt confirmation
- New demand alerts
- Billing report notifications
- Inventory status & movement
- Forecasting and planning

Special parts, machining & finishing

The source deck includes manufacturing / machined-part capabilities and an electro-plating facility with multiple plating options.

Plating facility

Process equipment

Production area

Capability focus

Special & customized fasteners • CNC / machined parts • Finishing / plating • Export-oriented manufacturing

Audits, recognition & continuous improvement

The source profile includes client audit evidence and recognition / appreciation material.

VDA 6.3 Prozessaudit: Revision: 2016

VDA QMC

Audit report VDA 6.3 Evaluation of quality capability

Supplier: **Precise Fasteners Pvt Ltd**

Location: **B-5-A Chudkopal Industrial Estate, Behind R city mall Indre**

Audit request: **Dana Prockova** Department: **Supplier Quality** Shift: **General**

Audit Reason: **Request From Norma Czech Republic** Order No.:

Date: **24-01-2022**

Audit result		Evaluation Index	CO (%)	Rating
Evaluated process element:				
P2, P3, P4, P5, P7		C _{pk}	81%	B
Evaluated product group:				
Fasteners		E _{pk}	81%	B
		E _{pk}	—	—
		E _{pk}	—	—
		E _{pk}	—	—

Classification score: A = 90 - 100% quality capable, B = 80 - 89% conditionally quality capable, C = 70 - 79% no quality issues

Statements / Requirements

Summary of the audit carried out

Strength: Good and experience team with positive approach towards improvement dimensional issues.

Weakness: No such weakness but good management to be vigilant.

Opportunities: To explore in new plating process to achieve 360 hrs salt spray.

During the audit the following significant findings were identified:

It has been observed that there is some misunderstanding and miscommunication regarding the specification and latest revision drawings.

Conclusion

Supplier has potential to deliver good quality parts as all data on issue in dimensions and sample delivery.

Further action

Urgent actions on understanding of standard and get revised drawing. Approval of feasibility and understanding of Customer specific require.

Schedule of action plan

Identification of measures	By	Effective date
	27-02-2022	24-04-2022
